

MLF/MLFM Series

Stackpole adds 0102 size melf

May 6, 2015

RALEIGH, NC – Stackpole Electronics Inc. has expanded its metal film melf series, MLF/MLFM to now include the 0102 size. This size is offered in 1/8W and 1/5W power ratings and is capable of tolerances down to $\pm 0.1\%$ and TCR's as low as ± 15 ppm. Melfs are well known for their outstanding reliability and stability as well as much lower self-induced heating compared to comparable flat chips. Melfs are a popular choice for applications such as metering and monitoring devices, instrumentation, medical imaging and ultrasound, and precision controls.

Pricing for the MLF18 and MLFM15 is resistance value, tolerance, and TCR dependent and ranges from \$0.03 to \$0.35 each in full reel quantities. Contact Stackpole or one of our franchised distributor partners for volume pricing. Many popular resistance values are in stock.
