

## MR Series

### Molded Axial Leaded Current Sense Resistors for Automated Placement

**RALEIGH, NC** (Apr. 6, 2017) – Stackpole’s MR series is a molded axial leaded series of current sense resistors with power ratings of 1, 3, 5, and 10 watts. The molded package provides tightly controlled dimensions making them ideal for automated placement equipment. The flat resistive element provides for values down to 5m $\Omega$  and tolerances as low as  $\pm 1\%$  in a non-inductive package. The MR series is a popular choice for high power current sense applications where the axial leaded resistors provide the optimal thermal connection for dissipating high power.

Pricing for the MR in full package quantities ranges from \$0.15 to \$1.00 each depending on volume, size and tolerance required. Contact Stackpole or one of our franchised distribution partners for volume pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email [marketing@seielect.com](mailto:marketing@seielect.com); or visit the website at [www.seielect.com](http://www.seielect.com).

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying to the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
