

PRESS RELEASE

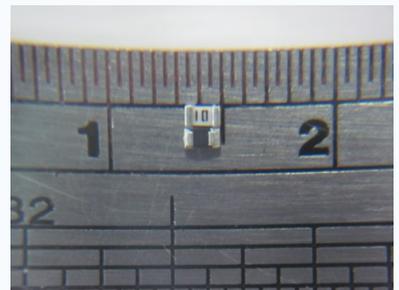

CSRF Series adds 0603 size with values down to 5 milliohms and 0402 down to 10 milliohms

RALEIGH, NC (July 30, 2013) – The CSRF series from Stackpole is a foil on ceramic carrier technology designed for precision current sensing applications. The addition of the 0603 chip size with resistance values down to 5 milliohm and 0402 chip size with values down to 10 milliohm are among the industry's lowest values available for those sizes. This allows for more efficient current sensing in smaller applications such as handheld electronics. In many cases, it will allow for downsizing applications that used larger size current sense resistors because low resistance values were required.

The CSRF series is available in sizes ranging from the new 0402 and 0603 up to 2512. This series offers tolerances as low as 1% and TCR's down to 50 ppm. Pricing is size, resistance value, tolerance dependent and ranges from \$0.088 to \$0.30 each in full reel quantities.

Contact Stackpole or one of our franchised distributor partners for volume pricing. Many popular sizes and values are currently in stock.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
