

PRESS RELEASE

RMCP Series of High Power Thick Film Chip Resistors

RALEIGH, NC (May 30, 2012) – The RMCP series from Stackpole is a high power thick film chip resistor series which allows power system design engineers to downsize current designs without sacrificing power handling. For example, the RMCP0603 has a 1/8 watt power rating, which is equivalent to the power rating for standard commercial 0805 size chip resistors. Available sizes range from 0402 up to 2512, resistance values range from 1 ohm up to 10M, with 100 ppm and 200 ppm TCR depending on resistance value and tolerance.

The RMCP is a good choice for any application requiring high power handling in a small package, which may include controls, remote sensors, power modules for networking and datacom equipment, motor controls, and LED lighting controls.

Pricing for the RMCP varies with size, tolerance, and resistance value and ranges from \$0.0063 to \$0.188 in full reel quantities. Contact Stackpole or one of our franchised distributors for pricing inquiries.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh, NC 27607; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now affiliated with Akahane Electronics, Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Hong Kong and Japan; and sales offices in Tokyo, Hong Kong and Taiwan.
