## Stackpole Expands Value Range of MLF / MLFM Series Melfs

RALEIGH, NC (January 28, 2014) – Stackpole has expanded the resistance range of its MLF / MLFM Series of metal film melf resistors. The ¼ watt and ½ watt sizes are now available in resistance values down to 10 ohms for TCR's of 25 ppm and tighter. In addition, the ½ watt size is now available in resistance values down to 0.2 ohms for TCR's of 50 ppm and 100 ppm. This value extension allows the use of the MLF Series for a wide variety of applications. It also expands the possibilities for use of the MLF Series as a surface mount replacement for similar sized axial leaded resistors.

The MLF / MLFM Series is a popular choice for a wide range of applications where stable operation and thermal stability are important, such as instrumentation and metering, controls, communications equipment, network analyzers, and automotive controls.

Pricing varies with size, value, tolerance, and tolerance and ranges from \$0.025 to \$0.62 each in full reel quantities. Contact Stackpole for volume pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email [marketing@seielect.com](mailto:marketing@seielect.com) or visit the website at [www.seielect.com](http://www.seielect.com).

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
