Stackpole Announces Improved Power Ratings for the RMCP1206 and RMCP1210 Sizes

RALEIGH, NC (Sept. 1, 2020) – Electronic devices that require downsizing or increased functionality may utilize high power surface mount resistors to accomplish this. High power surface mount chip resistors utilize materials designed for the higher temperatures associated with higher power levels. Stackpole’s RMCP series is a thick film technology providing higher power capability for a given chip size. Recently the power ratings for the RMCP1206 and RMCP1210 sizes have been improved to 0.5W and 0.66W respectively. This allows a single RMCP to be used in applications that may have required multiple chips of the same size.

The RMCP is a great choice for a wide range of portable electronics applications, power supplies, controls, communications, industrial electronics and automation, filtering, and low voltage input protection.

Pricing for the RMCP depends on size, resistance value, and tolerance. Contact Stackpole or one of our franchised distributors for specific pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 3110 Edwards Mill Road, Suite 207, Raleigh, NC 27612; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying to the world’s largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary’s, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
