Resistive Product Solutions

Stackpole's MLFM15 Now Offers 0.3W Power Rating

RALEIGH, NC (Oct. 11, 2022) – MELF resistors are known for their superior thermal characteristics and their environmental and electrical stability. Many types of applications such as instrumentation and automation controls, automotive controls, and metering benefit from the exceptional performance provided by MELF resistors. In designs where space is critical, it is important to maximize the power ratings for resistor to allow for the smallest design footprint. Stackpole's MLFM15 provides engineers with a solution that meets the thermal, electrical, and size requirements. The MLFM15 is a small device measuring only 2.2mm by 1.1mm nominal and now offers a 0.3W power rating for tolerances 0.5% and above and TCR's of 50 ppm and higher. The MLF / MLFM series is RoHS compliant without the need for exemption 7C-1.

Pricing for the MLF / MFLM varies with size, TCR, resistance value, and tolerance. Contact Stackpole or one of our franchised distribution partners for specific or volume pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 3110 Edwards Mill Road, Suite 207, Raleigh, NC 27612; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying to the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
